## 2. New Version of the *Rules of the Implementation of Certification for HACCP System*

On 29 July 2021, China published and implemented the new version of the *Rules of the Implementation of Certification for Hazard Analysis Critical Control Point (HACCP) System*.

During the transitional period, from 29 July 2021 to 31 December 2022, certification bodies can require enterprises to attain certification based on either the new version of

the *Rules of the Implementation of Certification for HACCP System* or the old version *the Rules of the Implementation of Certification for HACCP System over Dairy Products Manufacturers (for Trial Implementation)* along with the *Rules of the Implementation of Certification for HACCP System over Food Businesses*. From 1 January 2023 onwards, new enterprises applying for HACCP System Certification are obliged to comply with the new version of the *Rules of the Implementation of Certification for HACCP System* implemented by the certification bodies. Those enterprises accredited with the old

certification of the *Rules of the Implementation of Certification for HACCP System over Dairy Products Manufacturers (for Trial Implementation)* and the *Rules of the Implementation of Certification for HACCP System over Food Businesses* are obliged to convert to the new certification with the supervision or re-accreditation audit by the certification bodies.

Regarding certification of product safety, the newly amended HACCP stipulates that testing methods and items fully comply with the requirements of related guides, standards, regulations or provisions by China and importing countries or regions, along with testing carried out by independent statutory certification bodies on field products or end-products through sampling.

STC's worldwide laboratories have attained accreditations and recognitions from the local governments, e.g. HOKLAS, CNAS, CMA, DaKKS and more. For enquiries, welcome to email us at [hkstc@stc.group](mailto:hkstc@stc.group).

### 3. New Standard *Formaldehyde Emission Grading for Wood-based Panel and Finishing Products*

The China State Administration for Market Regulation and the Standardization Administration officially published GB/T 39600-2021 *Formaldehyde Emission Grading for Wood-based Panel and Finishing Products (Grading)* and GB/T 39598-2021 *A Guide to the Limited Quantity in Indoor Loading for Wood-based Panel Based on its Ultimate Formaldehyde Emission*. Both new standards will take effect from 1 October 2021.

The *Grading* stipulates grading requirements, testing methods and criteria for formaldehyde emissions from indoor wood-based panels or their products. The standard categorizes formaldehyde emissions from indoor wood-based panels or their products into 3 grades according to the amount of emissions, i.e.

Grade E1 ( $\leq 0.124 \text{ mg/m}^3$ ), Grade E0 ( $\leq 0.050 \text{ mg/m}^3$ )

and Grade ENF ( $\leq 0.025 \text{ mg/m}^3$ ). This standard applies to formaldehyde emissions from all types of indoor wood-based panels or their products, including fiberboard, particleboard, plywood, blockboard, multilaminar decorative lumber, laminated veneer lumber, glued-laminated lumber, surface-decorated wood-based panels, wooden flooring, wooden siding, wooden doors and more, while Grade E0 is equivalent to the limitations of CARB NAF by the US.

With a comprehensive VOC test chamber, laboratory in STC (Dongguan) provides testing services for ASTM D6670, ASTM E1333, BIFMA X7.1, BS EN 717-1, etc., as well as China's CMA accreditation to issue testing reports for China's domestic and export markets access. ## 新《人造板及其制品甲醛释放量分级》标准

市场监管总局和国家标准化管理委员会正式发布 GB/T 39600-2021《人造板及其制品甲醛释放量分级》（《分级》）和 GB/T 39598-2021《基于极限甲醛量的人造板室内承载限量指南》，两项新国标将于 2021 年 10 月 1 日起实施。

《分级》规定了室内用人造板及其制品甲醛释放量分级要求、试验方法以及判定规则。该标准将室内用人造板及其制品的甲醛释放量按照限量值分为三个等级，即 E1 级 ( $\leq 0.124 \text{ mg/m}^3$ )、E0 级 ( $\leq 0.050 \text{ mg/m}^3$ ) 和 ENF 级 ( $\leq 0.025 \text{ mg/m}^3$ )。该标准适用于纤维板、刨花板、胶合板、细木工板、重组装饰材、单板层积材、集成材、饰面人造板、木质地板、木质墙板、木质门等室内用各类人造板及其制品的甲醛释放量分级。E0 级相对美国 CARB NAF 的限制。
